Active Corporation Announces an ActiveECG™ bundle for the palmOne® Treo 650

Now Treo 650 users can turn their handheld into a portable cardiac monitor

CASTINE, Maine – September 13, 2005 – Active Corporation, Inc., producer of portable medical devices used “when life is on the line™,” today announced a product bundle specifically for the palmOne Treo 650. ActiveECG is an inexpensive, handheld, professional cardiac monitor which can be used with palmOne handheld computers.

The ActiveECG for Treo 650 bundle will include the ActiveECG cardiac monitor and accessories, and a Treo 650 compatible serial cable produced by PN Technologies (www.pcables.com), a \$65 value at no additional charge.

ActiveECG was first introduced in 2001 for Palm OS® handheld computers and has seen success in many applications including home health care, emergency medicine, and veterinary medicine. It was the first Palm OS based device to receive FDA 510(k) clearance for diagnostic use.

ActiveECG provides real-time display of ECG data and recording of ECG “strips” on a Palm OS handheld. ECG strips can be stored, reviewed and printed on any compatible PC, or transmitted to other computers or handhelds. This capability allows quick and easy remote diagnosis.

“The popularity of Palm’s Treo 650 has soared,” stated Jeffrey Siegel, President of Active Corporation. “We wanted to make it simple for Treo 650 users to obtain all the components they need to turn their handheld device into a diagnostic quality, portable cardiac monitor. With this product bundle, they can purchase everything they need in one place.”

Active Corporation is also announcing today the immediate availability of ActiveECG for Treo 650 via its eCommerce site <http://www.activecenter.com>. Orders may also be placed via phone at (207) 326-9100.

ActiveECG for Treo 650 has a price of \$699 and includes the ActiveECG hardware, a Treo 650 compatible serial cable, software for the Treo 650 and companion software for the PC, ECG leadwires, battery, test cable, extra cover, one set of ECG electrodes and is covered by a one-year warranty.
